

MONEY COLLECOTOR

Game Introduction

Guiding Ozalima left and right across a city street to catch falling banknotes (+10 score) while avoiding coins (lose 1 life, -5 score). Collect 75 notes to win. Lose all 3 lives and it is game over.

The game Uses :-

Language

Python 3.10+

Engine

Pygame

Goal: Collect 75 banknotes to win. Avoid coins or lose lives. Game over when all 3 lives are gone.

Requirements

- Python 3.13
- Pygame {pygame>}=2.5.0 (pip install pygame)

Controls

Key	Actions
← Left Arrow	Move Ozalima left
→ Right Arrow	Move Ozalima right
P	Pause / Resume the game
R	Restart (only on game-over screen)
Escape	Quit the game immediately

Level System

Levels unlock automatically as Ozalima collects more banknotes. Each level increases fall speed via a speed bonus multiplier.

Note Collected	Levels	Speed Change	Banner Shown
0 – 24	1	+0	—
25 – 49	2	+2	Level 1 Finished
50 – 74	3	+4	Level 2 Finished
75+		+6	Level 3 Won → WIN

Difficulty formula: $\text{difficulty} = \text{elapsed_seconds} / 14.0$

Spawn interval: $\max(0.30, 1.0 - \text{difficulty} \times 0.05 - \text{speed_bonus} \times 0.02)$
